

GAME DAY PLAYBOOK

AVAccess operators guide

10 DirecTV H25 boxes · 35 TVs · iPad in Home Assistant Companion

Tune over IP (SHEF). Route with the AVAccess matrix. There is no IR remote and no Xumo.

Greensboro ZIP 27403 · local affiliates first on blackouts

1. Open the iPad

Open **Home Assistant Companion** (or Safari) and sign in. The sidebar has two operator surfaces. Use both.

Sidebar	When to use it
Sports Routing	Bartender iPad. Pick a game or DirecTV channel, then send it to ALL / 4-way / 9-way or to specific TVs.
AVAccess Matrix	One-tap favorites (FOX Local, NFL Afternoon, All Sunday) plus presets, program letters, and route-to-TVs.

AVAccess Matrix Control tab. Sidebar also shows Sports Routing. Now Playing is DirecTV (staging stub text until site HA is live).

No IR · H25 SHEF + AVAccess matrix

Page 2

2. Sports Routing — pick a game

This is the bartender panel. Sport chips across the top: NFL, CFB, NBA, NHL, MLB, WNBA, Guide, TVs. Leave **Live commit** off unless you mean to change the wall. Dry-run Send only updates occupancy on the iPad.

Sports Routing · NFL. Tap a game card, then choose ALL / 4 programs / 9 programs or Pick TVs.

3. Sports Routing — DirecTV guide

Tap **Guide** for the DirecTV lineup in ZIP 27403. Search by number, name, or title. If listings are stale you still get the channel list (as below). On site HA with a fresh EPG, Now/Next titles fill in.

Guide heading is DirecTV · ZIP 27403. Channel numbers are DirecTV majors, not Spectrum/Xumo.

4. Sports Routing — send to the wall

After you pick a game: **ALL** = every TV on ENC-01 / H25-01. **4 Prog** = striped across ENC-01...04. **9 Prog** = striped across ENC-01...09. Then tap **Dry-run Send**. Turn Live commit on only on the site HA when inventory hostnames are real.

Pick TVs

ALL
One program on ENC-01 → all 35 TVs

4 Prog
Pick up to 4 programs; striped across ENC-01..04

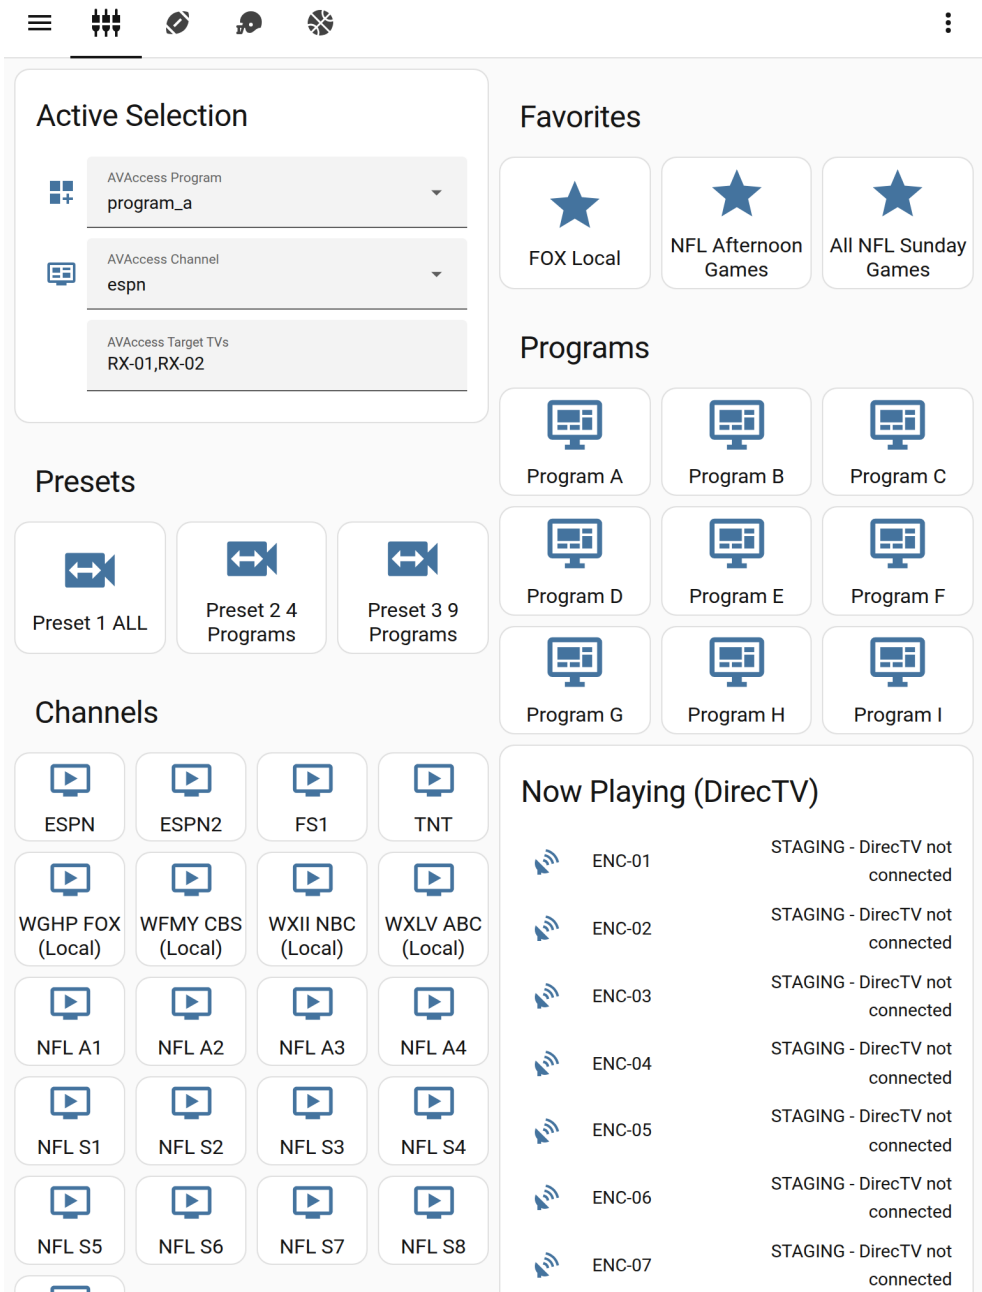

9 Prog
Pick up to 9 programs; striped across ENC-01..09

Dry-run Send

Chiefs @ Bills → ALL (all 35 TVs). Dry-run Send is the default. Live Send tunes the H25 over SHEF, then UDP-reconnects the TVs.

5. Matrix — iPad Control tab

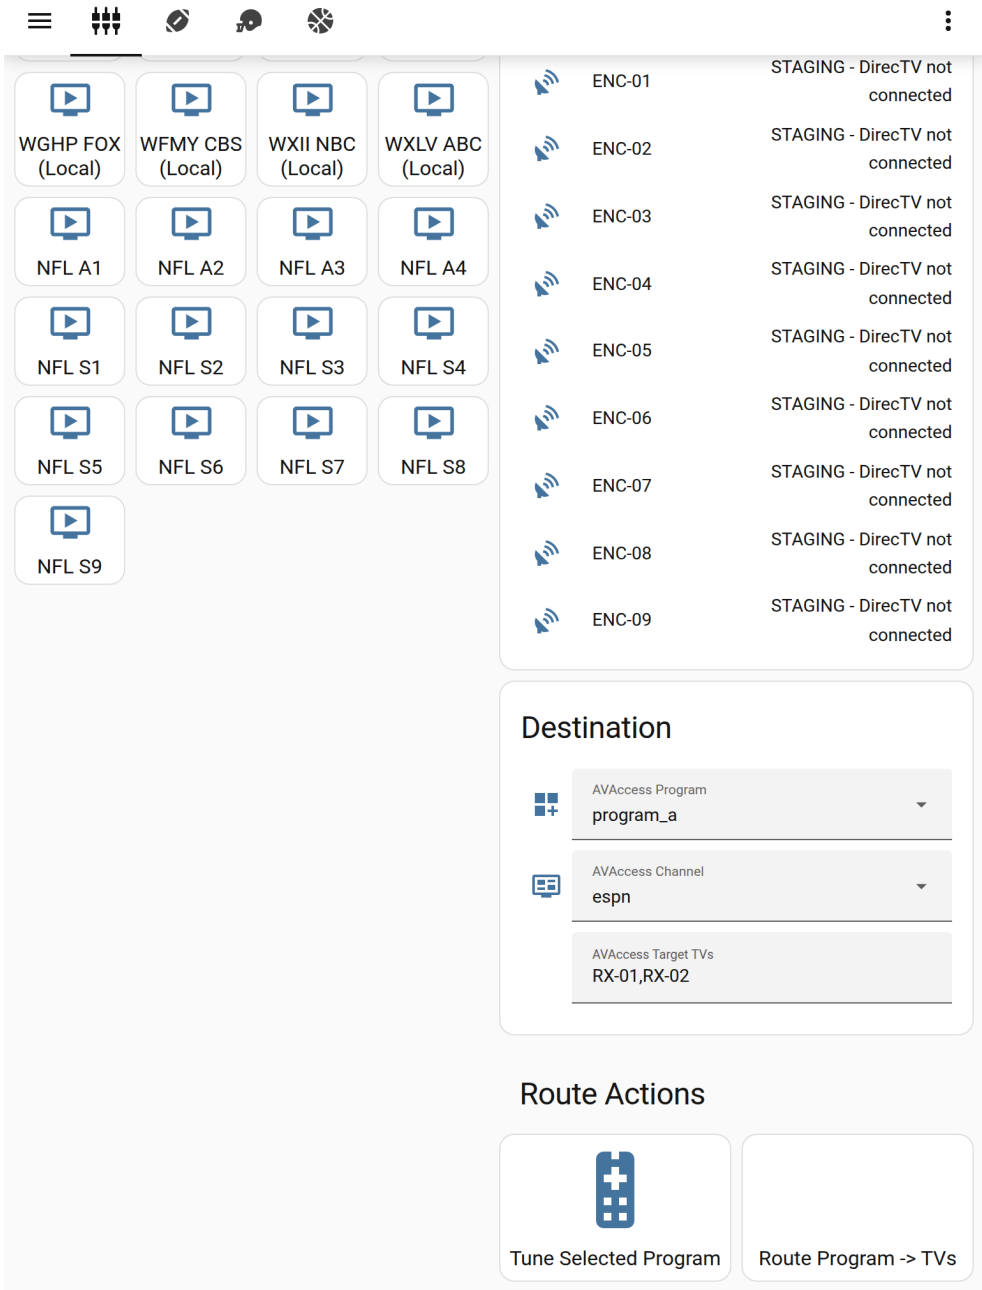

Use this for one-tap favorites. Stars at the top: **FOX Local**, **NFL Afternoon Games**, **All NFL Sunday Games**. Program A is H25-01 / ENC-01. Channel buttons retune that box. Now Playing shows each H25.

iPad portrait Control tab — favorites, presets, programs, channels, DirecTV Now Playing.

6. Matrix — route one program to specific TVs

Scroll to **Destination** and **Route Actions**. Put receiver IDs in Target TVs (example **RX-01,RX-02**), tap the program letter, then **Route Program -> TVs**. That does not retune the H25 — it only points those TVs at the encoder. Tune first if the box is on the wrong channel.

iPad Control scrolled to Destination + Route Program -> TVs. Target TVs is RX-01,RX-02.

7. Matrix — sport tabs

Same routing cards, shorter channel lists. Use NFL for Sunday Ticket slots A1–A4 and S1–S9. College Football and Basketball keep local + cable sports nets.

8. Proof the tap ran

Home Assistant **Activity** lists each script. Look for **Ran** on Favorite FOX Local, route-to-TVs, and presets. On the bar, also look at the wall: TVs follow the preset, and the H25 OSD / Now Playing matches the channel.

Activity after FOX Local, Route Program -> TVs, and Preset 2. Each script shows Ran (and On/Off).

9. Game-day cheat sheet

You want	Tap
All TVs on local FOX (WGHP)	Matrix Control → FOX Local or Sports Routing → that FOX game → ALL → Send
Afternoon NFL package (four games)	Matrix → NFL Afternoon Games or Sports Routing Preset 2 / 4 Prog with four games
Every Sunday game (nine-way)	Matrix → All NFL Sunday Games
One overflow TV onto Program C	Target TVs = that RX (example RX-22) → Program C → Route Program -> TVs
Wrong channel on one box	Tap that Program letter → tap the correct channel. Other TVs on that program follow (same H25).

What the words mean

Word	Meaning
Program A...I	One DirecTV H25. A = ENC-01 / H25-01 ... I = ENC-09 / H25-09. ENC-10 is spare.
Preset 1 / 2 / 3	Which TVs watch which program (the AVAccess matrix). Layout only — does not change channel by itself.
Channel / Guide number	DirecTV major. FOX local is WGHP. Sunday Ticket is 705+ unless blackout prefers local.
Dry-run Send	Plan only. Does not talk to H25s or the switch.
Live Send	SHEF /tv/tune on that H25, then UDP msg_b_reconnect to the TVs. Keep Live commit off until you mean it.

If something looks wrong

Symptom	Try
TVs did not split	Tap the preset again. Activity should show the preset script Ran.
Right layout, wrong game	Tap the Program letter, then the channel (or the matching favorite).
One TV on the wrong program	Route that RX to the program you want.
Now Playing says STAGING	You are on the cloud UI stub. Site HA shows live H25 titles after External Access is on.
Sunday slot is Ticket instead of local	Re-run weekly sync. ZIP 27403 prefers WGHP/WFMY/WXII/WXLV over 705–713 when both carry the game.

Staging vs the bar

	These photos (staging)	Site / production HA
Buttons and tabs	Same	Same
Channel / preset / route	Scripts run; shell is echo STAGING	HTTP SHEF to each H25 + UDP to the AVAccess switch
Now Playing	Dummy sensor text	Official DirecTV media_player titles
IR / Xumo	Not used	Not used
